Mission Analysis…Need to Change Logistics C2…..

Work with the Stakeholders: Joint Force Commanders and the Services

Build

Unified Action

- Integrate MN Capabilities
- Support IA Planning & Execution
- Rapidly deploy, project & sustain
- Improve means to integrate joint ops

Capability

Integrate

- Unity of Effort
- ITV
- Speed
- Eliminate Duplication of Effort

Enablers

"We have to change the way we do business…"

-LTG Christianson, JS J4

We must support a Fluid, Dynamic, Highly Light and Lethal Operational Environment with Very Adaptive Adversaries*

**Capstone Concept for Joint Operations (CCJO)*

Problems JxDS is trying to fix

Consistent theater log issues from past twenty years of operations (ODS, OEF, OIF, etc.):

- ***"Logistics by committee" with no single POC in charge of overall logistics execution to ensure unity of effort***
- ***Lack of total asset and in transit visibility***
- ***Poor communications between key theater log elements/nodes and national supply base***
- ***Redundant, wasteful, unconnected distribution system***
- ***Lack of accountability, ownership, supply discipline***
- ***Excessively complex and inefficient procedures***
- ***Lack of standing capability; too much ad hoc***
- ***Poor linkage between planners and executors***
- ***Poor linkage between logisticians and operators***

Joint Experimental Deployment and Support (JxDS) Concept

A family of scalable joint and combined capabilities that serve to enhance the coordination, integration, and synchronization of logistics in order to produce an operational effect resulting in increased force employment opportunities and alternatives.

JxDS- Transforming Logistics C2.....

..Through Experimentation to Find the Right Solution For the JFC

Determine where gaps & seams are in Deployment, Distribution &

Experiment to test concepts, training and techniques

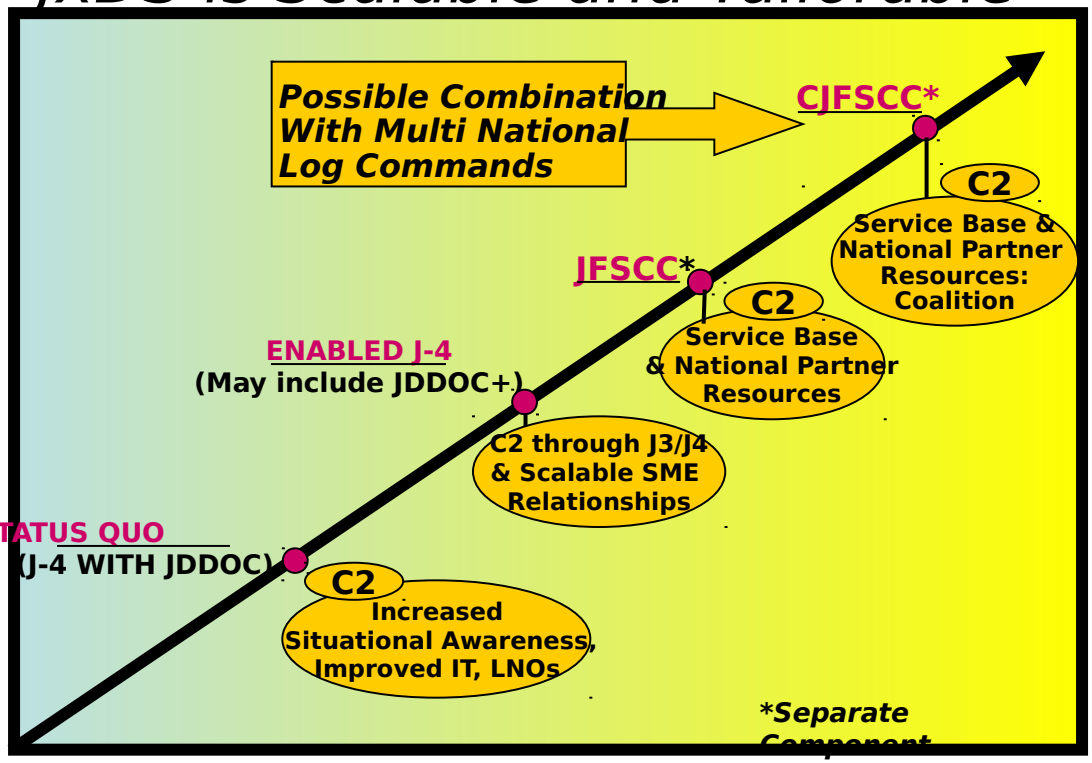
Develop Joint TTPs and Joint Trained Logisticians

Find the right enablers to facilitate improved Deployment, Distribution & Support

Breadth
Depth
Number of Nations
JOA Size

SCALABILITY

JxDS is Scalable and Tailorable



Log CROP

Geography, Number of Distribution Nodes, Rapid Deployment, Disparate & Distributed Operations Multi-National Coalition

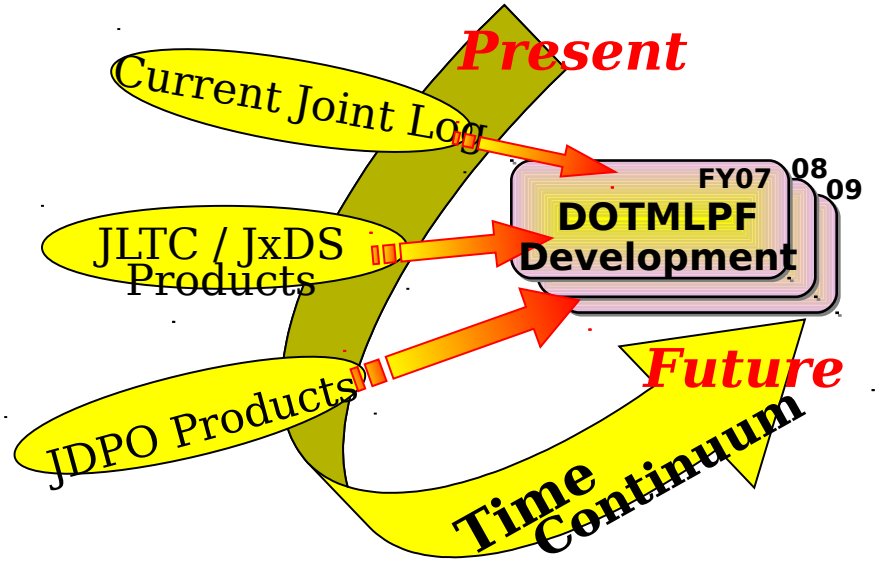
……Solutions for Institutionalization…DCRs



DOTMLPF Priorities link to JS J4 Focused Logistics Priorities

End State: Produce Value Added Products which support Joint Focused Logistics & the COCOM Warfighter.

JxDS for USEUCOM & USPACOM

ENABLED J-4 Concept of Operations

General

The current version of Joint Publication 4-0, Doctrine for Logistics Support of Joint Operations, provides military guidance for the exercise of authority by combatant commanders and other joint force commanders and prescribes logistics doctrine for joint operations and training. It provides military guidance for use by the Armed Forces in preparing logistics related matter for their appropriate plans. The publication does not restrict the authority of the joint force commander (JFC) from organizing the force and executing the mission in a manner the JFC deems most appropriate to ensure unity of effort in the accomplishment of the overall mission.

The last sentence in the preceding paragraph is important in the development of concepts for joint logistics. As the concepts for the various forms of the Joint Experimental Deployment and Support (JxDS) capability are written, JP 4-0 is the authority to change/transform the ways and means the J4 directorate at the combatant command is organized.

Because joint force commanders can organize their J4 as they deem appropriate to carry out tasks in execution of their mission, understanding the relationship of the terms, mission, operation, and tasks, is important to the successful organizational development of a Logistics Staff (J4). The relationship of these elements becomes
